2020.12.15 15:34 Â· Alert; Hello, My name is Siddhartha. 2020.12.15 07:50 Â· Alert; Hello,

My name is Siddhartha. 5 Answers. If your

XAPO sensor is not working,

pluggingreeblercinema4dserialnumber in with a new set of XAPO batteries will usually fix the issue. The first step is to take the sensor

apart. If you don't have any other replacement parts, the new sensor will be much easier to install. Locate the three wires coming out of the sensor that run to the circuit board. These wires should go to the 3-pin JST connector. The Black wire connects to ground, the Red wire connects to the positive power wire, and the White wire connects to the Negative power wire. You should use a new set of JST connectors as XAPO usually uses these. It's recommended you use a little more than the minimum required. The sensor will be slightly larger when you complete the job. I usually use about 3 times as much as my sensor's wire size so that I have enough excess. It's also a good idea to sand down the part that goes inside of the sensor housing. This is because the sensor housing will collect dust and makes it more difficult to push the new JST connector into the housing. The sensor housing should be removed. When you take the sensor apart, you have two halves of a housing. The electronics housing is attached to the outer housing. It's important to carefully remove the electronics housing from

the outer housing. It's also not necessary to reuse the outer housing. I usually cut my existing outer housing and then pop it off. The outer housing is used for the mounting of the electronics housing. When you take your electronics housing out of the outer housing, the sensor will be free. You should wait for the sensor to cool before you start work. The sensor housing is extremely delicate. Do not work on your sensor housing until the sensor is cool. The sensor housing contains the sensor inside. The sensor housing is usually a one-piece housing. It's important to be careful when you remove the sensor housing. The sensor housing is very sharp. If you use the wrong
